Risk Management Associates, Inc. and its employees are experts in physical security, system design, and investigations. We are in the business of protecting assets and reducing crime. We accomplish this by focusing on all the elements of security: people, process, and technology. One size does not fit all, so a security program should be tailored to the needs of the organization while still remaining true to industry standards and best practices.

RMA neither represents nor endorses any specific line or brand of equipment. Rather, the staff works to keep abreast of the latest developments in security technology. This allows us to provide each client solutions that meet their specific requirements and budget.

Since 1988, RMA has secured America’s infrastructure, including agencies at the federal, state, and municipal level. In addition, RMA has a proven track record providing consulting, investigative, and training services for clients in banking, pharmaceuticals, utilities, secondary and higher education, consumer products, manufacturing and distribution, and a variety of other industries. It is a privilege to serve our customers and we are proud to say that we continue to service some of the same companies that we began servicing in 1988. Located in Raleigh, North Carolina RMA has customers in over 40 states and 6 countries.
